### PRODUCT DESCRIPTION

7" Colour TFT LCD Monitor with built-in Quad Control

### NARRATIVE

NSM-7400Q is a high performance 7" Colour TFT LCD Monitor with built in quad multiplexer capable of withstanding vibrations up to 7G. The 4 channel inputs are perfect for rear & side mounted cameras on machinery, heavy duty vehicles, horse floats etc.

It comes with single, dual, triple, quad image and PIP functions, with trigger wires to automate each camera. This industrial display can be set up with single or split views by default, with backup distance grid & left/right turning indicator arrows.

The monitor gives a very bright display with good contrast, and comes with day/night brightness modes. Easy to setup and use, the NSM-7400Q makes reversing even easier and safer!
